Our Story

Kettle & Crumb doesn't exist — it's a stand-in bakery built purely so you have real content to scroll through while testing scroll-depth triggers in GTM (25%, 50%, 75%, 90% are the usual checkpoints).

Keep scrolling past this paragraph and GTM's built-in Scroll Depth trigger should fire once you cross each threshold, assuming you've turned it on in your workspace.

Once you're comfortable with clicks, forms, and scroll, try adding a Timer trigger or a Visibility trigger on this section to round out your practice.
