

A GOOGLE TAG MANAGER PRACTICE SITE

Kettle & Crumb

A neighborhood bakery, now practicing its first website.

This is a practice site built for testing Google Tag Manager — every button, form, and section here is a real trigger you can wire up: clicks, form submits, scroll depth, and outbound links.

[Download Menu PDF](#)

WHAT'S INSIDE

- Today's Menu — six items; clicking a card fires `select_item`, and Add to cart fires `add_to_cart`
- Hero buttons — Order Now fires `cta_click` and opens `checkout.html`; Download Menu PDF is a file-download link
- Our Story — long-form copy for practicing 25/50/75/90% scroll-depth triggers
- Newsletter & Contact — two forms firing `newsletter_signup` and `contact_form_submit`
- Footer social links — outbound-click triggers for Instagram, Facebook & WhatsApp

Container ID: GTM-PM9BRNDX

Today's Menu

Each menu selection and add-to-cart action sends item-specific ecommerce data to the dataLayer for GTM and GA4.

Double Roty

Rs. 100

data-item: double-roty

Sourdough Loaf

Rs. 480

data-item: sourdough-loaf

Cold Brew

Rs. 320

data-item: cold-brew

Tandoori Chai

Rs. 150

data-item: tandoori-chai

Pepsi

Rs. 150

data-item: pepsi

Crunchy Chicken Pasta

Rs. 900

data-item: crunchy-chicken-pasta

Ecommerce data layer samples

```
dataLayer.push({ ecommerce: null }); // reset before each push
dataLayer.push({
  event: "add_to_cart",
  ecommerce: {
    currency: "PKR", value: 480,
    items: [{ item_id: "sourdough-loaf", item_name: "Sourdough Loaf",
      price: 480, quantity: 1 }]
  }
});
```

Clicking anywhere on a menu card (except the button) fires GA4's select_item event:

```
dataLayer.push({ ecommerce: null });
dataLayer.push({
  event: "select_item",
  ecommerce: { item_list_id: "main_menu", item_list_name: "Today's Menu",
    items: [{ item_id: "sourdough-loaf", item_name: "Sourdough Loaf",
      price: 480, quantity: 1 }] },
  selected_item_id: "sourdough-loaf", selected_item_name: "Sourdough Loaf"
});
```

Our Story

Kettle & Crumb doesn't exist — it's a stand-in bakery built purely so you have real content to scroll through while testing scroll-depth triggers in GTM.

Keep scrolling past this paragraph and GTM's built-in Scroll Depth trigger should fire once you cross each threshold, assuming you've turned it on in your workspace.

Once you're comfortable with clicks, forms, and scroll, try adding a Timer trigger or a Visibility trigger on this section to round out your practice.

Forms & events on this site

Trigger	Event pushed	Section
Order Now button	cta_click (cta_id: order_now)	Hero
Download Menu PDF link	file download / link click	Hero
Menu card click (×6)	select_item	Menu
Add to cart (×6)	add_to_cart	Menu
Newsletter form	newsletter_signup	Newsletter
Contact form	contact_form_submit	Contact
Social links (×3)	outbound click	Footer

Get the weekly bake list

Submitting this form fires a "newsletter_signup" event — no real email is sent anywhere.

Contact Us

This form fires a "contact_form_submit" event on submit — nothing is stored or emailed.
